

Concurrency & Mutual Exclusion

REQUIREMENTS

Use the following GitHub repository to understand the requirements of the Lab:
<https://github.com/SajedHassan/CSEx61-Operating-Systems/blob/main/Labs/lab3/README.md>

INSTRUCTIONS

1. You MUST use C programming language.
2. There is no need to implement string manipulation codes on your own.
3. Use the assignment on Microsoft Teams for the delivery of Lab 3.
4. You should upload a compressed file that contains your program's source code.
5. Individual work is required.
6. Any copies or unannounced collaboration will be considered cheating and will be severely penalized.
